- **SQL Server**
- **Windows Server**

Work Experience

TBL
Position: *Full-Stack Developer*

eCommerce SaaS Application(Elleen)
Collaborated with a team to develop a multi-tenant eCommerce SaaS platform using Laravel and MySQL. Key contributions:
- Implemented store onboarding and tenant isolation logic.
- Developed product management, order handling, and payment integration modules.
- Enabled customizable themes and settings for each tenant's storefront.

Mixpay Wallet Project
Collaborated with a team to develop a digital wallet using Laravel and MySQL, integrating local and global payment gateways.
 Key contributions:
- Implemented controllers for global gateways (Payeer, PayPal, Stripe) and local methods (Jawali, Floask).
- Developed secure wallet management, transaction handling, and user authentication systems.
- Integrated CoinMarketCap API to fetch live cryptocurrency rates and support currency exchange operations.

Hospital Management System
Helped develop a full-featured hospital management system using Laravel and MySQL. Delivered modules for:
- Billing, Appointments, Out-Patient (OPD) and In-Patient (IPD).
- Insurance & Mortgage, Pharmacy, Radiology, Lab Services, Blood Bank, and Operations.
- Services Pricing, Human Resources, and Referrals.

School Management System
Built with CodeIgniter and MySQL, extended the system with:
- Employee loan and allowance tracking.
- Class section organization.
- System functionality enhancements.
- Multi-branch support for expanded service reach.

ElaphPro
Position: *Full-Stack Developer*

Hotel Booking Management System
Led the development of a full-featured hotel booking management system using Laravel and MySQL. Key features included:
- Room reservations with real-time availability and calendar integration.
- Guest check-in/check-out tracking, invoicing, and reporting.
- Role-based access and secure admin control panel.

ERP System – HR Module
Contributed to enhancing the ERP system by developing a comprehensive Human Resources module:
- Employee profile and contract management.
- Attendance and leave tracking.
- Payroll calculation and salary slip generation.
